### [3] Waste (WS)

Various types of toxic waste can be generated at the university, for example:

- used fluorescent lamps;
- batteries and batteries;
- expired chemicals;
- chemical residues after conducting experiments and research.

The University can organize work on the management of toxic waste as follows:

**Collection and storage.** Organize collection points for various types of toxic waste. Waste should be stored in special containers that meet safety requirements.

**Transportation.** To agree with a specialized company that has a license to handle hazardous waste. Waste must be transported following safety requirements.

**Recycling.** Transfer the waste to a specialized company for disposal or neutralization.

**Reporting.** Keep records of the formation, collection, storage, transportation, and disposal of toxic waste by the law.

**Staff training.** To train employees on the rules of toxic waste management.

**Environmental education.** To conduct lectures, seminars, and master classes for students on the importance of proper waste disposal and how to implement it.

**Monitoring and evaluation of results.** Track the amount of toxic waste collected and disposed of, as well as evaluate the effectiveness of ongoing activities.

### [3.9] Total volume of toxic waste produced

Type of toxic waste	Total Produced (ton)
- electronics	0.5
- lab. Chemicals	0
- etc	0,5

#### **Description:**

As part of the environmental protection and environmental culture improvement program, the University carried out work on the collection, storage, transportation and disposal of toxic waste.

Collection points have been organized for various types of toxic waste: used fluorescent lamps, batteries and batteries, expired chemicals and chemical residues after experiments and research.

The waste is stored in special containers that meet safety requirements. An agreement has been concluded with a specialized company that has a license for hazardous waste management. Employees are being trained in the rules of handling toxic waste.
