[5] Transportation (TR)

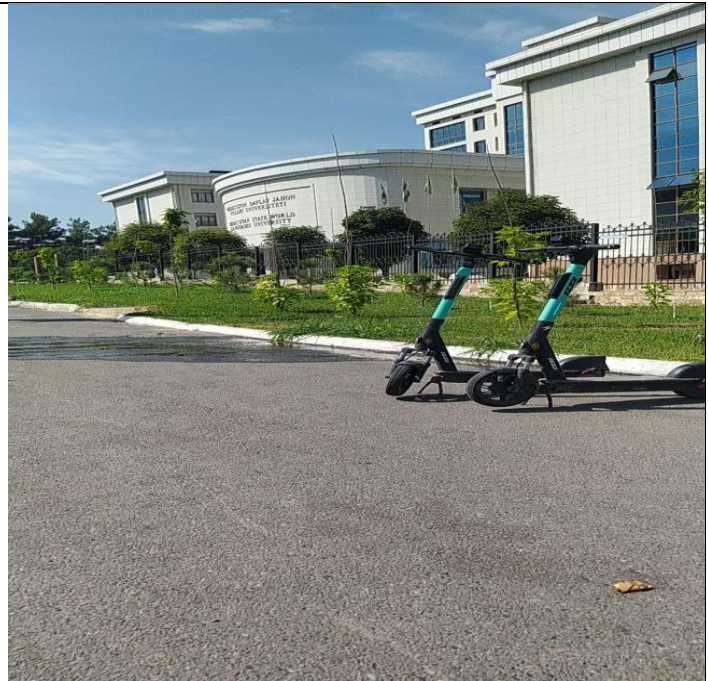

The program to limit or reduce the parking area is a program aimed at limiting or reducing parking spaces. It can be implemented in cities and other localities to solve problems with congestion, lack of free space, and environmental pollution.

The program may include the following measures:

- limit the number of parking spaces;
- increasing the cost of parking;
- introduction of paid parking areas;
- Encouraging the use of public transport, bicycles, and hiking.

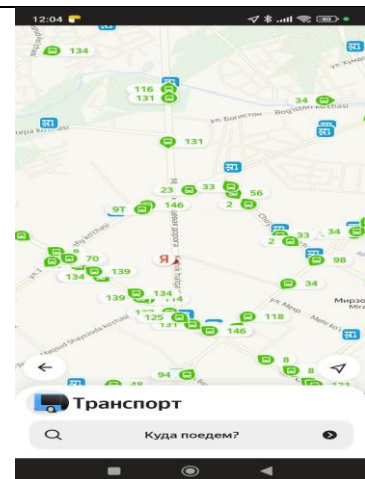

These measures can help reduce the number of cars on the roads, which, in turn, will improve the transport situation and the environmental situation in the city. However, the implementation of such a program requires careful planning and consideration of possible consequences for the residents of the city.

[5.14] Program to limit or decrease the parking area on campus for the last 3 years (from 2021 to 2024)

Limiting parking zone (UzSWLU)

Free Bicycle(skuter) for rent

A mobile application for tracking public transport (UzSWLU)

Description:

The following events were held within the framework of the program:

- limit the number of parking spaces;
- increase in the cost of parking;
- introduction of paid parking areas;
- Encouraging the use of public transport, bicycles, and hiking.

These measures were aimed at reducing traffic congestion, reducing traffic jams, improving the environmental situation and increasing the number of people using alternative modes of transport.

Results:

- Traffic congestion in the area of the program has decreased.
- The number of traffic jams has decreased.
- The environmental situation has improved.
- The number of people using public transport, bicycles and hiking has increased

To assess the effectiveness of the program, regular measurements of the level of traffic congestion and the environmental situation were carried out. A survey of residents of the area was also conducted to identify their attitude to changes in the parking system. The survey results showed that the majority of residents support the program and consider it useful for improving the transport situation and the environment.
