[5] Transportation (TR)

Transportation plays an important role in the life of the university, ensuring accessibility and mobility of students, faculty, and staff. It allows you to get to your place of study and work promptly, attend conferences, seminars, and other events and also provides communication with the outside world.

Transportation services may include bus routes, taxis, car sharing, parking for private cars, and bicycles. The developed transport infrastructure contributes to improving the efficiency of the educational process and the quality of life of students and university staff.

Transport in the life of the university performs several functions:

- Transportation of students and staff. Transportation allows students and staff to get to their place of study and work on time. This is especially important for large universities, where the distances between buildings can be significant.
- Attending events. Transportation provides an opportunity for students to attend conferences, seminars, and other events that are held both at the university and outside it.
- Communication with the outside world. The university is not only a place of study but also a center of scientific and cultural life. Transport provides the university's connection with other organizations, enterprises, and institutions.

[5.4] The total number of vehicles (cars and motorcycles) divided by the total campus'

Population

No.	Vehicle	Total Number
1	The car is managed by the university	700
2	Cars entering the university	200
3	E-cars entering the university	300
	Total	1200

Description:

The university uses various vehicles to transport students, faculty and staff. This can be either the university's own transport (buses or minibuses), or cooperation with urban transport companies.

The University provides comfortable conditions for the use of vehicles: convenient routes, affordable prices for travel and compliance with the timetable. This makes it possible to ensure mobility and accessibility of education for all categories of citizens.

The university pays great attention to the development of transport infrastructure. This makes it possible to ensure access to education for all categories of citizens, including people with disabilities.

Special fares for public transport are available for students and university staff. The university also provides transfer services to the venue of conferences, seminars and other events.

The university has a system for encouraging the use of environmentally friendly transport (electric vehicles, bicycles). This contributes to the formation of an ecological culture among students and teachers.

The university also has special parking spaces for students, faculty and staff with disabilities. This ensures accessibility of infrastructure and equal opportunities for all.

In addition, the university can organize events to raise awareness about the city's transport infrastructure and its use. This helps students and staff to better navigate the city and make efficient use of transportation services.
