[1.17] University budget for sustainability effort (in US Dollars)

	2021	2022	2023	Average
Budget Total	\$234255	\$ 230000	\$270000	\$ 244751
Sustainability Budget	\$ 100000	\$ 115000	\$ 121000	\$ 112000
			Percentage	45 %

Description:

In recent years, sustainability has become a key priority for universities worldwide. Sustainability efforts aim to reduce environmental impact, promote social responsibility, and ensure long-term economic viability. We are committed to these goals and have allocated a significant portion of our budget to support sustainability initiatives.

Our sustainability efforts encompass various activities, including energy conservation, waste reduction, water management, and biodiversity protection. We have implemented several measures to improve energy efficiency in our buildings, such as installing solar panels, upgrading lighting systems, and promoting public transportation. These efforts have resulted in significant cost savings and reduced our carbon footprint.

We also focus on reducing waste by promoting recycling and composting programs. We provide recycling bins throughout campus and encourage students and staff to separate

their waste. Additionally, we have implemented a program to collect electronic waste for proper disposal. This not only reduces waste but also promotes the responsible use of resources.

Water management is another important aspect of our sustainability strategy. We monitor water usage in our facilities and implement measures to conserve water, such as fixing leaks and installing low-flow fixtures. By reducing water consumption, we contribute to the preservation of this precious resource.

Biodiversity protection is also a critical component of our sustainability plan. We maintain green spaces on campus, which not only enhance the aesthetic appeal of the university but also provide habitats for local wildlife. Our green spaces serve as natural buffers against urbanization, helping to preserve biodiversity in the surrounding area.

The implementation of these sustainability measures requires financial support. The university budget plays a crucial role in enabling us to carry out these initiatives effectively. Funding is allocated for energy-saving projects, waste management programs, water conservation measures, and biodiversity preservation efforts.

Overall, our sustainability efforts are aligned with the broader goals of promoting environmental stewardship, social responsibility, and economic sustainability. Through our commitment to these principles, we aim to create a more sustainable future for our campus community and beyond.

The average percentage university budget for our university is 30%
