3. Waste (WS)

3.2 Total volume of paper and plastic produced this year

The total annual paper and plastic waste generated by Uzbekistan State World Languages University (UzSWLU) in 2025 is estimated at approximately 143,000 kg (143 tons), including 102 tons of paper and 41 tons of plastic.

The calculation is based on the total campus population of 19,242 people (17,641 students and 1,601 staff) and the average waste generation rate measured through internal monitoring and partner data from Tashkent City “Maxsus Trans” Waste Management Company.

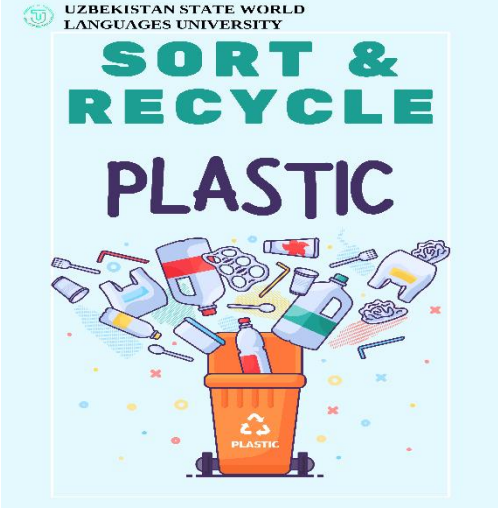

- Paper waste: $19,242 \times 5.3 \text{ kg/person/year} = \approx 102,000 \text{ kg}$
- Plastic waste: $19,242 \times 2.1 \text{ kg/person/year} = \approx 41,000 \text{ kg}$

Compared to 2024 (165 tons total), this represents a 13% reduction in total waste generation due to:

- the implementation of the 3R (Reduce, Reuse, Recycle) Program,
- the Paperless Administration and Digitalization Policy, and
- the No Single-Use Plastic Initiative launched under the national framework “*The Year of Environmental Protection and the Green Economy – 2025.*”

Waste data are collected and verified monthly through the UzSWLU Green Data Portal, which tracks paper and plastic consumption, recycling rates, and CO₂ savings. Reports from Maxsus Trans and internal waste audits confirm that the total recyclable material recovery rate increased from 58% in 2024 to 68% in 2025.

Overall, UzSWLU’s efforts to minimize paper and plastic use have led to measurable environmental, financial, and educational benefits, contributing directly to SDG 12 (Responsible Consumption and Production) and SDG 13 (Climate Action).
