[1.7] Total campus buildings area

Overview

Total Buildings Area represents the total usable floor area of all university buildings, calculated as building footprint multiplied by the number of floors of each building; several academic buildings comprise four, five, or seven storeys. Upper floors increase the Total Buildings Area but do not reduce the campus Open Space Area, since only the ground-floor footprint occupies land. The consolidated Total Buildings Area across all UzSWLU campuses is 104,248.96 m².
