3. Waste

3.13 (WS.13) Total Volume of Toxic Waste Produced This Year

During the **2026 reporting period**, Uzbekistan State University of World Languages (UzSWLU) generated approximately **2.18 metric tons (2,180 kg)** of toxic and hazardous waste across its campuses.

The reported volume consists primarily of hazardous materials generated through laboratory activities, maintenance operations, information technology services, and facility management. Annual waste data are compiled through the university's environmental monitoring system and verified by the Campus Management Division together with the responsible university units.

Composition of Toxic Waste

Waste Category	Annual Volume
Expired laboratory chemicals	760 kg
Chemical residues and laboratory spills	540 kg
Fluorescent lamps (mercury-containing)	470 kg
Batteries and accumulators	290 kg
Contaminated laboratory glassware and protective materials	120 kg
Total Toxic Waste	2,180 kg (2.18 metric tons)

Monitoring and Management

Hazardous waste is collected separately at designated storage points using clearly identified containers for each waste category. Waste quantities are recorded throughout the year by the Campus Management Division in cooperation with the Faculty of Natural Sciences and other responsible administrative units.

The university maintains digital records of hazardous waste generation through the UzSWLU Green Data Portal to support environmental monitoring, regulatory compliance, and annual sustainability reporting.

Summary Table

Indicator	2026
Total Toxic Waste Generated	2.18 metric tons
Reporting Period	2026
