3 Waste

3.12 (WS.12) Inorganic Waste Treatment

Inorganic Waste Treatment

Uzbekistan State World Languages University (UzSWLU) has established an integrated inorganic waste treatment system based on waste segregation, recycling, material recovery, and environmentally responsible disposal.

During the **2026 reporting period**, the university generated approximately **74 metric tons** of inorganic waste, of which **53 metric tons (72%)** were treated through recycling, material recovery, and authorized municipal waste management services.

Inorganic waste, including plastic, glass, metal, electronic waste, and other non-biodegradable materials, is collected separately through color-coded waste segregation points installed across academic buildings, administrative offices, student dormitories, and public areas.

Recyclable materials are transferred to authorized recycling facilities through the university's cooperation with the Tashkent City "**Maxsus Trans**" **Waste Management Company**, while electronic waste is handled through certified recycling arrangements to ensure environmentally responsible treatment.

Treatment Summary

Indicator	2026
Inorganic Waste Generated	74 metric tons
Inorganic Waste Treated	53 metric tons
Treatment Rate	72%
Treatment Status	Partial (>65–85% treated)

Monitoring and Verification

The treatment of inorganic waste is monitored by the Department of Natural Sciences and the Campus Management Division. Monthly waste collection and recycling records are reviewed together with reports from the university's authorized waste management partners to verify treatment volumes and recycling performance.
