

UzSWLU Low Income Student Completion Target 2025

SDG 1 No Poverty | Reporting year 2025

Uzbekistan State World Languages University applies an institutional target that at least **85%** of eligible low-income students scheduled to complete their studies in a reporting year should successfully complete their degree programs. Eligibility is verified through recognized national social-protection records and supporting socio-economic documentation.

2025 completion result

Measure	2025 value
Total graduates	6,174
Eligible target-group students expected to complete	618
Eligible target-group students who completed	607
Institutional completion target	At least 85%
Actual completion result	98.22% - target achieved
Target-group share of all graduates	10.01%
Target-group graduates recorded as employed	607 - 100%

Calculation and scope

Completion rate: $607 / 618 \times 100 = 98.22\%$. The denominator comprises eligible target-group students scheduled to complete in 2025; the numerator comprises those who completed all academic requirements or were awarded their degrees in 2025. Progression to the next academic year is not counted as degree completion. Of the 618 eligible target-group students, 11 did not complete their degree in 2025 for documented individual reasons and are excluded from the numerator accordingly.

"Graduate-2025" evening for the graduating cohort, 14 June 2025

National policy and employment context

During the 2025 reporting year, Presidential Decree No. PF-158 of 11 September 2023 approving the *Uzbekistan 2030 Strategy* provided the national policy framework for expanding higher education, strengthening social protection, reducing youth unemployment and supporting stable and productive employment. The Strategy included goals to improve youth employment and to ensure that general secondary schools are fully staffed with university-educated teachers.

These national priorities support the University's graduate-employment work. This context is particularly relevant to UzSWLU because a substantial part of its academic provision prepares language teachers and other education professionals. According to the University's 2025 graduate-employment monitoring records, all 607 target-group graduates were recorded as employed. Employment is reported as an additional outcome and is not used to calculate the completion rate.
