UZBEKISTAN STATE WORLD LANGUAGES UNIVERSITY

Women's Graduation Tracking and Gap Closing

Registrar's Office records | Gender-disaggregated graduation data | Support to completion

Uzbekistan State World Languages University records graduation by gender through its Registrar's Office and compares the results year on year. The overall completion rate is 98%. Women were 4,021 of the 5,004 graduates in 2024 (80.36%) and 5,447 of the 6,174 graduates in 2025 (88.22%), an increase of about 7.9 percentage points in one year. A network of support measures works to keep women in study through to graduation: the Women's Advisory Council and faculty advisers, tutors, the Psychological Service, free childcare rooms on every campus and flexible study arrangements for student mothers.

Measurement and tracking

The Registrar's Office is the responsible unit for student registration, academic records, data management and official reporting. Its electronic application and registration system holds gender-disaggregated records of applicants, entrants and graduates.

Graduates are recorded by gender, by level of study (bachelor's and master's) and by faculty, and the annual results are compared from one year to the next:

Year	Total graduates	Women graduates	Men graduates	Women's share	Overall completion
2024	5,004	4,021	983	80.36%	98%
2025	6,174	5,447	727	88.22%	98%

The University's admissions monitoring provides the entry baseline for these results. Women were 82.60% of first-year entrants in 2022–2023, 87.06% in 2023–2024 and 87.68% in 2024–2025, so entry composition and graduation outcomes can be read side by side.

Support to keep women in study to completion

- Women's Advisory Council and faculty advisers: identify women students who need academic, social, legal, psychological or material support, coordinate referrals and monitor planned work.
- Academic advising and tutors: provide early contact with students at risk of interruption, help resolve academic barriers and connect students with faculty services.
- Psychological Service: offers confidential counseling and referral support for stress, well-being, family difficulties and other issues that may affect continuation.
- Childcare and student-mother support: each campus has a free children's room, the Main Building has a Mother and Child Room, and the Maternity Policy provides flexible study arrangements (online classes, extended assignment deadlines and modified examination schedules), so that caring responsibilities do not prevent attendance, practical training or completion.
- Leadership, mentoring and targeted seminars: women-focused leadership, psychological well-being, rights-awareness and mentoring activities strengthen belonging, confidence and participation, especially for students who need additional support.

Conclusion

UzSWLU tracks graduation by gender through the Registrar's Office, reports the results annually, and maintains a set of institutional measures that support women's completion of their studies. With an overall completion rate of 98% and women forming 88.22% of graduates in 2025, the University's records show women completing their studies at scale.
