Free Drinking Water for Students, Staff and Visitors

SDG 6 Free drinking water | Reporting year 2025

UzSWLU provides free, filtered drinking water to everyone on its campuses — students, staff and visitors alike. Drinking water stations are located in teaching buildings, student dormitories and open campus areas, and no payment, registration or identification is required to use them.

Drinking water provision

- **Filtered drinking water stations.** The number of filtered drinking water stations on campus increased from 9 to 24 under the University's water program, including covered outdoor stations in public areas of the campus.
- **Filtered water dispensers.** In addition to the public stations, 145 filtered water dispensers are installed in teaching blocks, offices and residential halls, giving staff and students free drinking water close to where they study, work and live.
- **Water quality.** Drinking water is supplied from the city mains and passes through multi-stage filtration before reaching the stations. Quality is checked against the national drinking water standard O'z DSt 950:2011 "Drinking water. Hygienic requirements and quality control."
- **Reducing bottled water.** To encourage the use of free stations instead of bottled water, the University distributed more than 2,500 reusable bottles to students and staff.
