Water Management Education for Local Communities

SDG 6 Community water education | Reporting year 2025

Uzbekistan State World Languages University (UzSWLU) provides educational opportunities for local communities to learn about good water management. This outreach is led by the Department of Ecology and Green Resources, established on 30 January 2025 within the Faculty of Translation, whose work focuses on water conservation, the introduction of eco-technologies and the expansion of green areas.

Outreach in neighborhoods and schools

Students of the Department conduct awareness-raising activities in local neighborhoods (mahallas) and schools on saving water and on the scarcity of drinking water. Through these activities, local residents and school communities learn how to conserve freshwater and use water responsibly in their homes and daily lives. Students also take part in related scientific trainings, competitions and exhibitions.

Public information on water management

The University also shares knowledge on water management with the wider public through the media. On 5 September 2025, the national newspaper Yangi O'zbekiston (issue 184) published the article "Suv muammolari va jurnalistika" (Water Problems and Journalism) by UzSWLU lecturer Malika Saburova. The article discusses water-resource security, efficient water use and water-saving technologies, and the role of the media in informing the public and shaping public attitudes toward water.

Bugunning gapi

SUV MUAMMOLARI VA JURNALISTIKA

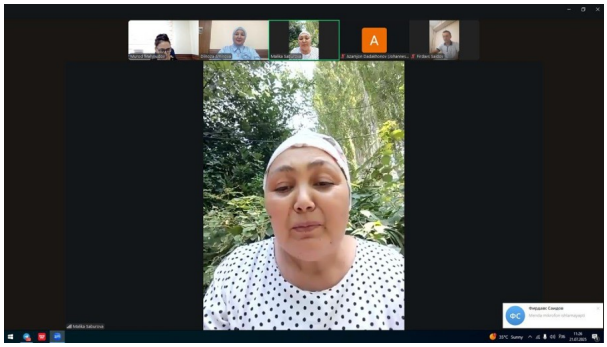

Malika SABUROVA,
O'zDJTU xalqaro jurnalistika fakulteti o'qituvchisi

Suv — hayot manbai, tiriklik saodati. Yurtimizda suv resurslarini asrash va samarali boshqarish bo'yicha qator muhim chora-tadbirlar amalga oshirilmoqda. Obihayot tanqisligiga qarshi kurashish, uni tejash texnologiyalarini joriy etish, suv havzalari va manbalarini muhofaza qilishga qaratilgan loyihalar shular sirasiga kiradi.
