Cooperation with Government on Water Security

SDG 6 Water security cooperation | Reporting year 2025

Uzbekistan State World Languages University (UzSWLU) cooperates with local and national government bodies on water security. Its cooperation focuses on protecting the city water system from pollution, preparing for water-related emergencies, ensuring the safety of campus water, and contributing to national dialogue on environmental policy and water-saving technologies.

Local level: Tashkent city water authorities and emergency services

- **Tashkent City Water Supply JSC.** The University obtains its water from the city network operated by the state-owned Tashkent City Water Supply JSC (Toshkent shahar suv ta'minoti AJ) under an annual service contract, and wastewater from all campus buildings is discharged to the city's central treatment system after on-site pre-treatment.
- **Joint water-quality verification.** Monthly samples taken at 12 discharge points on campus are analyzed for pH, turbidity, biochemical and chemical oxygen demand and suspended solids, and the results are verified jointly with the city water utility to confirm that University discharges do not threaten the municipal water system. Drinking-water quality on campus is likewise checked in cooperation with the utility.
- **Emergency preparedness.** Under its Water Incident Response Plan, the University conducted two practical emergency exercises in 2024–2025 together with the Tashkent water authority and the district emergency department, testing joint responses to incidents that could contaminate water or disrupt supply.

National level: dialogue on environmental policy

On 30 May 2025, UzSWLU hosted the international scientific and practical conference "Modern Environmental Policy: From National Experience to Global Solutions," attended by representatives of ministries and government agencies together with national and international scholars. The introduction of water-saving technologies was among the priority directions discussed, providing a platform for exchange between academia and government on the country's environmental and water challenges.

International conference "Modern Environmental Policy: From National Experience to Global Solutions," 30 May 2025

Summary of cooperation

Level	Government partner	Form of cooperation
Local	Tashkent City Water Supply JSC (state-owned utility)	Water supply and wastewater services; joint verification of discharge and drinking-water quality
Local	Tashkent water authority; district emergency department	Two joint water-emergency exercises (2024–2025)
National	Representatives of ministries and government agencies	International conference on environmental policy, including water-saving technologies (30 May 2025)
