UZBEKISTAN STATE WORLD LANGUAGES UNIVERSITY

Promoting a Public Move Toward Renewable Energy Beyond the University

SDG 7 Affordable and Clean Energy | Reporting year 2025

UzSWLU promotes a public move toward renewable energy beyond the University through international conferences, academic partnerships and public discussion involving administrators, scholars and policymakers from outside the institution. This advocacy role is grounded in the University's SDG 7 Policy and its Commitment to Net-Zero Emissions by 2050, both of which identify renewable-energy adoption and public awareness as institutional priorities.

On 30–31 May 2025, UzSWLU hosted the international scientific-practical conference “Modern Environmental Policy: From National Experience to Global Solutions,” bringing together representatives of the University of World Economy and Diplomacy, the SCO Public Diplomacy Center, the International Innovation Center for the Aral Sea Region, York University (Canada), RISEBA University (Latvia) and Osh State University (Kyrgyzstan), alongside national and international scholars, professionals, ministry representatives and students. In her opening remarks, the Vice-Rector identified the development of green energy, together with water-saving technologies, as a national environmental priority under the “Uzbekistan–2030” strategy. Over the two days, sessions examined national and international experience in environmental policy, innovative approaches to sustainable development and prospects for international cooperation, concluding with proposals and recommendations on environmental literacy and youth participation in environmental protection.

International conference "Modern Environmental Policy: From National Experience to Global Solutions," 30–31 May 2025

This conference meets the advocacy objective of the indicator: it is a University-convened meeting and discussion, beyond the University, in which renewable energy was promoted as a national priority to an external, multi-institutional and ministry-level audience.

Conference evidence

Element	Detail
Date	30–31 May 2025
Title	International Scientific-Practical Conference, “Modern Environmental Policy: From National Experience to Global Solutions”
Host	Uzbekistan State World Languages University
External participants	University of World Economy and Diplomacy; SCO Public Diplomacy Center; International Innovation Center for the Aral Sea Region; York University (Canada); RISEBA University (Latvia); Osh State University (Kyrgyzstan); national and international scholars, professionals, ministry representatives and students
Renewable-energy content	Opening remarks identified the development of green energy, alongside water-saving technologies, as a national environmental priority under the “Uzbekistan–2030” strategy; the two days of sessions covered national and international experience in environmental policy, innovative approaches and

	sustainable-development principles
Outcome	Proposals and recommendations on environmental literacy, youth participation and ecological thinking were put forward; certificates of appreciation were issued to active participants

Supporting institutional framework

Instrument or activity	Relevant provision	What it supports
SDG 7 Policy	Commits the University to renewable-energy adoption, energy efficiency, awareness and public engagement	Institutional policy basis
Commitment to Net-Zero Emissions by 2050	Identifies renewable energy and public awareness among its implementation areas	Long-term institutional direction
Green Campus Council	Coordinates sustainability activities and renewable-energy infrastructure across campuses	Institutional oversight
International conference and partnership activity	Brings the University's renewable-energy and environmental-policy direction to an external, multi-institutional and ministry-level audience	Direct evidence for this indicator

Conclusion

UzSWLU promotes a public move toward renewable energy beyond the University, most directly through the May 2025 international conference on environmental policy, which placed green-energy development before an external, multi-institutional and ministry-level audience. This advocacy activity is grounded in the University's own SDG 7 Policy and its Commitment to Net-Zero Emissions by 2050, and is carried forward through continuing academic partnerships and public discussion of renewable energy.
