UZBEKISTAN STATE WORLD LANGUAGES UNIVERSITY

Measuring and Setting Targets for Sustainable Commuting

SDG 11 Sustainable Cities and Communities | Reporting year 2025

Uzbekistan State World Languages University (UzSWLU) measures how its students and staff travel to and between its campuses and sets targets to increase the share of walking, cycling, public transport, shared transport and electric vehicles.

Measurement

- **Commuting emissions:** the University's Institutional Greenhouse Gas Emissions Inventory 2025 includes commuting by students and staff in Scope 3, calculated for the whole campus population of 24,058 people (22,208 students and 1,850 staff).
- **Travel surveys and counts:** annual travel surveys of students and staff record the share of each mode of transport, and vehicle entries to campus are counted through the QR-based vehicle permit system.
- **International assessment:** commuting and transport data are reported each year to UI GreenMetric, where UzSWLU scored 1,400 points in the Transportation category in 2025.

Targets

Target	Measure
Increase sustainable commuting	At least 85% of students and staff travel by public transport, on foot or by bicycle
Car-free campus	At least 80% of central campus areas reserved for pedestrians and cyclists
Lower transport emissions	Progressive reduction of campus transport emissions toward carbon-neutral campus transport by 2030
