UZBEKISTAN STATE WORLD LANGUAGES UNIVERSITY

Measuring Waste Generated and Recycled

SDG 12 Responsible Consumption and Production | Reporting year 2025

Uzbekistan State World Languages University (UzSWLU) measures the waste generated and recycled across the University under the UzSWLU Waste Management Policy. The Department of Administrative Affairs keeps records for each waste stream and compiles annual totals.

How waste is tracked

Waste stream	Record	2025
Mixed municipal waste	Acts of services rendered by the contracted waste removal company Maxsus Trans	Removed under contract from all campuses and residences
Food waste	Handover records of the Department of Administrative Affairs	19.25 tonnes handed over for processing
Recyclables	Receipts and acts of acceptance from recycling organizations	Collected separately in labeled bins
Hazardous waste	Handover records with licensed organizations	Handed over under the Hazardous Waste Disposal and Management Policy

Waste totals for 2025

In 2025 the University generated 693 metric tonnes of waste. Of this, 336 tonnes, including 19.25 tonnes of food waste, were recycled or handed over for processing, and 357 tonnes were sent to landfill.

Indicator	Metric tonnes	Share
Waste generated	693	100%
Waste recycled	336	48.5%
Waste sent to landfill	357	51.5%

Financial records

Waste removal is paid for under the University's budget item for cleaning and waste removal services. Payments under this item from contract funds and the Development Fund were 204,034,331 UZS in 2024 and 301,052,856 UZS in 2025, as recorded in the University's annual financial reports.

Separation and awareness

Separate bins for paper, plastic and mixed waste are placed on campus, and the Department of Ecology and Green Resources trains students in solid waste management. Students also explain waste separation and recycling to residents of Guzar mahalla in monthly campaigns held under the national Concept for Raising the Ecological Culture of the Population until 2030.
